

# LIQUID RELEASE

LQBR

## Tech Data Sheet

July 2016

### Product Description

VIEIRA LIQUID RELEASE is a clear liquid release agent for stamped concrete that is bubble gum scented. It is used as a bond breaking barrier to prevent tools from sticking and marring the fragile surface. LIQUID RELEASE is a dust-free alternative to powder release agents and is more forgiving to work with since it is not coloured and will not smudge like powdered antiquing release.

### Uses and Benefits

VIEIRA LIQUID RELEASE is designed for the clean release of mat-type texturing tools. When applied appropriately VIEIRA LIQUID RELEASE allows for a clean mat release with minimum to no effect in pattern transfer.

### Coverage Guidelines

Actual coverage may vary depending on application method, concrete surface finish, wind conditions and other local conditions. Typical coverage is 200 ft<sup>2</sup>/gal when applied with a sprayer.

### Packaging

Packaged in 18.9L (5 gal) pails.

### Manufacturer

Vieira Concrete Supplies  
357 Gage Ave. N.  
Hamilton, ON  
L8L 7A8
