

CONCRETE FLATWORK INNOVATION
INTRODUCES...

FORMING THE FUTURE OF CONCRETE FLATWORK

The ultimate solution for
FASTER, more **ACCURATE** and
COST EFFECTIVE flatwork.

FORM SMARTER WITH CRIB-IT FORMS

FORM SMARTER, NOT HARDER.

Tired of disposable wood forms? Upgrade to **CRIB-IT**, the revolutionary galvanized **steel forming system** for sidewalks, driveways, patios, and pool decks. Built from **durable 16-gauge steel**, CRIB-IT is **reusable, interlocking, and easy to assemble**, saving you time, money, and waste. With unmatched longevity and efficiency, it pays for itself in just a few jobs—a **smart investment for any contractor**.

WHY CHOOSE CRIB-IT?

Ditch inconsistent edges and unreliable wood forms—CRIB-IT ensures **precision, durability, and efficiency** on every pour. Its **adjustable, interlocking design** allows for **complex shapes and flawless finishes**, making it ideal for any project. With **90% faster setup**, reduced labor costs, and effortless adjustments, CRIB-IT saves time and money while delivering professional-grade results every time.

90% FASTER SET UP TIME

Interlocking design allows for quick, easy assembly; no need for screws, nails or complex adjustments.

90% FASTER DISSASSEMBLY

Simply pull the stakes, separate the forms, and move to the next job.

90% COST SAVINGS

Long-lasting durability, outlasting traditional materials and reducing ongoing expenses.

100% ACCURACY

Our forms are accurately crafted with precision for consistent straight or curved runs.

100% SUSTAINABLE

Our forms are made of 100% recyclable materials.

EVERYTHING YOU NEED TO GET STARTED WITH CRIB-IT

Enhancing your cribbing is easy with Crib-It, our **PATENT PENDING** kit includes 150 linear feet of cribbing – enough to do a 75' driveway or a 16' x 32' pool deck.

YOUR KIT INCLUDES:

- ▶ 1FT STRAIGHT BEAM 5.5" HEIGHT – Quantity of 4
- ▶ 2FT STRAIGHT BEAM 5.5" HEIGHT – Quantity of 4
- ▶ 4FT STRAIGHT BEAM 5.5" HEIGHT – Quantity of 4
- ▶ 6FT STRAIGHT BEAM 5.5" HEIGHT – Quantity of 4
- ▶ 8FT STRAIGHT BEAM 5.5" HEIGHT – Quantity of 8
- ▶ INSIDE 90 DEGREE JOINER (Corner) – Quantity of 4
- ▶ OUTSIDE 90 DEGREE JOINER 12" (Corner) – Quantity of 4
- ▶ 18" INNER STRAIGHT JOINER – Quantity of 20
- ▶ 8' Flexi Form – Quantity of 4
- ▶ 5" Flexible joiner – Quantity of 4
- ▶ BREAKAWAY FILLER 11" W 5.5" H – Quantity of 2

PROUDLY MADE IN CANADA
PATENT PENDING

OUR FAQ'S TO HELP YOU

HOW LONG WILL THE FORMS LAST?

With proper care & using a light spray of form protector, your forms should last for many years. We have tested these forms over the last few years and they are still performing as well as they did the day we started using them.

CAN I INSTALL THE FORMS BEFORE I ADD MY GRAVEL OR SUB-GRADE?

Although we recommend assembling the forms after the gravel or sub-grade is added for ease, you can in fact put the forms together before this step. You would just have to adjust the forms after the fact by using shims & level the forms with a cotter pin in the stake. Further instructions can be given for this method.

WHAT IF I FORGOT TO SPRAY MY FORMS BEFORE USE; HOW WOULD I REMOVE THE CONCRETE?

We do highly recommend spraying the forms before each use to protect them from concrete sticking. A light scrape with a putty knife quickly removes any residue.
